COVER IMAGE

The cover of this edition of *The Journal of Applied Laboratory Medicine* shows two clinicians collaborating to develop an integrated personalized interpretation of the patient's laboratory results. The expert

diagnostic management team is profiled in this month's review article by Dr. Michael Laposata titled, *The Definition and Scope of Diagnostic Error in the United States and How Diagnostic Error is Enabled*, as a means of reducing test overutilization and helping clinicians get the right test, for the right patient at the right time.
