COVER IMAGE

This issue's cover is intended to highlight the contribution "It's Not Just a Needlestick: Exploring Phlebotomists' Knowledge, Training, and Use of Comfort Measures in Pediatric Care to Improve the Patient Experience." This young patient is undergoing phlebotomy; he is calm and in no acute distress. This paper and the issue's cover remind laboratorians that phlebotomists' use of comfort techniques is essential for a pediatric patient's satisfactory experience. (See article on page 847.)
