Beating Cancer with Early Detection: A Seasoned Idea with New Insights

Edited by Drs. Vathany Kulasingam,
Eleftherios P. Diamandis and Lori Sokoll

The *Journal of Applied Laboratory Medicine (JALM)* is pleased to announce an upcoming special collection titled "Beating Cancer with Early Detection: A Seasoned Idea with New Insights". This issue will include articles on circulating tumor DNA, protein-based markers and the utility of cancer screening. It will highlight the technical and clinical challenges associated with cancer biomarker discovery.

SEEKING SUBMISSIONS IN THE FOLLOWING AREAS:

- > Cancer genomics, proteomics, transcriptomics and other omics
- > Novel technologies for cancer diagnostics
- > Harmonization and quality assurance in cancer biomarkers
- > Cancer biomarker repositories and biobanking
- > Personalized cancer biomarkers for precision medicine
- > Novel strategies for biomarker discovery and validation

Be a part of JALM's special collection!

JALM invites authors to submit original articles and case reports related to tumor markers. Journal guidelines for submission apply as described in the information for authors. Submissions must be received at submit.jalm.org by April 6, 2018.
